If desired Using DuraClear Satin Varnish, varnish all pieces except the chalkboard using the appropriate sized brush.

Do all permanent black pen line work.

Techniques

Basecoat -Total opaque coverage, solid so you cannot see through it. Two thin coats are preferable to one heavy coat. A good tip is to load the brush, never more than halfway up the bristles. Start in the center of the area to be painted and push the paint out to the pattern line. This technique will leave no ridges on the edge of your painted area.

Float - Load brush first in floating medium or water, pat of excess on paper towel. Tip one corner of brush in color; blend color through bristles using short back and forth motion on palette. Color should graduate from heavy on the corner that you loaded to no color on opposite corner. If when you begin to paint, you have color showing from both corners of brush, it is improperly loaded. Rinse and start again.

Liner-Work -thin your color with water to consistency of heavy cream. Load brush in thinned color. As you pull brush through the paint roll so that you keep a nice sharp point.

Glaze - A thin transparent wash of color usually applied over first color to slightly alter first color.
